

## African Actors in World Politics

### Descriptif

The African continent and its relations with the rest of the world contribute to our understanding of world politics by various means. They first raise fundamental questions on the state and its conceptualization as the basic unit in international relations: what is at stake when statehood and sovereignty is claimed? How has the Westphalian order interfered with African states' trajectories? What can be understood when exploring the history of imperial rivalries? These conceptual and historical insights provide an indispensable background in order to tackle with major contemporary issues, such as the current logics of cooperation and conflict among African states and intrastate communities, the promises of multilateral institutions and regional integration, the struggle against racism and the politics of identity, the quest for citizenship, or the influence of diasporic communities in world politics.

### Pré-requis souhaités

Students should have basic knowledge in International Relations, International Political Economy and/or political science.

### En bref

**Crédits ECTS :** 2.0  
**Nombre d'heures :** 18.0  
**Temporalité :** Semestriel  
**Type d'enseignement :** Cours magistral  
**Année :** 3 | Troisième année  
**Mode de validation :** Autre
