

Introduction to the management of organizations

Presentation

This class provides students with the tools for understanding the fundamental mechanisms of financial management of social and solidarity economy enterprises, and more particularly of associations. The financial information (balance sheets, profit and loss accounts, financial reports, etc.) produced by these organizations is analyzed from a dual perspective: internally, to be able to decipher management tools; and externally, to communicate with the third parties that constitute their environment.

In brief

ECTS credits : 2.0

Number of hours : 18.0

Teaching term : Six-monthly

Teaching activity : Lecture course

Year : Fourth year

Validation : Final written examination
