Formule pédagogique

This class involves two main types of activities: 1) practice-related activities: the class prepares the participation of students in the annual Eurotemis conference and the European Union simulation organized in Bayonne with the Universities of New Aquitaine; 2) discussion about current knowledge: during the second semester, the class turn into a "book club" that focuses on the European Union; a book club through which students engage in discussions on the basis of presentations of readings from some essential works.
