

Measures of poverty and vulnerability

Presentation

This class explores the main approaches to poverty and vulnerability, distinguishing the monetary approach from non-monetary approaches (basic needs approach and capacity approach). Starting from these approaches, we will highlight the main methodological issues associated with the measurement of poverty and vulnerability in developing economies.

In brief

Number of hours : 18.0

Teaching term : Six-monthly

Teaching activity : Seminar

Year : Fifth year

Validation : Final oral examination
