

Managerial practice

Presentation

The class is organized like a team coaching session with role-playing, personality tests, and analog games, so as to help students understand the main keys to daily team management. Based on what the students bring up, the fundamentals of management are discussed and illustrated with real-life examples. The aim is to identify, for each student, the skills and interests that will enable him/her to manage teams of varying size and composition in the very near future, and to enable him/her to approach these questions pragmatically in order to best perform his/her future duties as head of a department, unit or project.

In brief

Number of hours : 4.0

Teaching term : Six-monthly

Teaching activity : Seminar

Year : Fifth year

Validation : Continuous assessment
